

Protection of the Environment Trust Grant Program

BACKGROUND

What is the Protection of the Environment Trust?

The Protection of the Environment Trust (the trust) was established in 2006 with a twofold purpose:

- To promote the protection and enhancement of the natural environment or of a significant aspect of the natural environment and in particular, the conservation of flora and fauna indigenous to the Local Government area; and
- For the provision of information or education or the carrying on of research about the natural environment or a significant aspect of the natural environment in particular relating to flora and fauna of the area for the benefit of persons with the Local Government area.

What is the Protection of the Environment Trust Grant Program?

The Protection of the Environment Trust is able to provide small amounts of financial support to individuals, groups and organisations in the community that are able to deliver projects and works that contribute to the stated purpose of the Trust. The projects and works are not restricted to on-ground activities.

The Protection of the Environment Trust may elect to preferentially fund projects that are consistent with a particular topic or theme within the Trust's stated purpose. The Trust may, for example, choose to fund different organisations to deliver complementary projects about a significant native species.

The grants program is open to community groups and organisations, incorporated associations, not-for-profit organisations, non-commercial cooperatives, education organisations and research organisations.

Available Funding

The annual funding available for the Protection of the Environment Trust is in the order of \$60,000, however this amount may vary between years. The Trust will aim to fund multiple projects each year with available funds. Funding requests by eligible applications should therefore be scaled accordingly.
